At Emergent, our mission is to **protect and enhance life.**

We develop, manufacture, and deliver protections against public health threats through a pipeline of innovative vaccines and therapeutics. For nearly 25 years, we've been at work defending people from things we hope will never happen—so that we're prepared, just in case they ever do. We do what we do because we see the opportunity to create a better, more secure world. One where preparedness empowers protection from the threats we face. And peace of mind prevails.
